

MacCamp Spring 2018 Application

April 20-22 • Oral Hull Park • Sandy, Oregon

CLASS 1

Saturday morning

Cool Custom Slide Shows with Keynote

With Chris Kent. Keynote at its heart is a big slideshow creator. Learn how to create a simple slideshow with titles, photos, text on photos and slide transitions. Use and customize the master slides to create cool backgrounds and borders. Add the Magic Move tool to put animation into your slide show and a music soundtrack to finish up, then save the project as a Quicktime movie, pdf file or as individual jpegs to print. And we'll do it all with an iPad — but everything you learn is applicable to Keynote for Mac.

CLASS 2

Saturday afternoon

iPhone Photography 2

With Loren Leed and John Lutz. This will be a continuation of the Fall MacCamp class, with a short refresher lecture on photo basics/iPhone camera functions, followed by lots of hands-on practice. The bulk of the class will consist of short lessons, each focusing on a simple theory with an accompanying hands-on exercise. Outside photo exercises will be included weather permitting.

CLASS 3

Sunday morning

Handy Software and Hardware for the Mac

With Charles DeVore and Steve Riggins. There will be an overview of some of our most useful software and hardware for the Mac. Class participation encouraged!

Number in Party _____ Email _____ Phone _____
